## Navidrome

[navidrome.org/](https://navidrome.org/)

```
apt update
apt upgrade
apt install ffmpeg
```

```
sudo useradd -M <Benutzername>
sudo passwd <Benutzername>
```

```
sudo install -d -o <user> -g <group> /opt/navidrome
sudo install -d -o <user> -g <group> /var/lib/navidrome
```

```
wget -c https://github.com/navidrome/navidrome/releases/download/v0.51.1/navidrome_0.51.1_linux_
_amd64.tar.gz -O Navidrome.tar.gz
sudo tar -xvzf Navidrome.tar.gz -C /opt/navidrome/
sudo chown -R <user>:<group> /opt/navidrome
```

```
sudo nano /var/lib/navidrome/navidrome.toml
LogLevel = 'DEBUG'
ScanSchedule = '@every 24h'
TranscodingCacheSize = '150MiB'
MusicFolder = '/mnt/music'
```

```
sudo nano /etc/systemd/system/navidrome.service
```

..... siehe [Installation](#)

```
sudo systemctl daemon-reload
sudo systemctl start navidrome.service
sudo systemctl status navidrome.service
sudo systemctl enable navidrome.service
```

## Troubleshooting

Stopping Navidrome, deleting all navidrome.db.\* files in the data folder, and starting it again.
